

Start this response in class and finish it outside of class

5. If you could design a *classroom* that incorporated the elements of positive learning experiences, what would it be like? (Again, try to write 500 words. One does this by including details; support for your proposals and decisions; considering alternative, perhaps negative evaluations of your classroom proposal that you can then explain as not truly relevant under the scenario you are proposing.) Use what you have learned in this class!

Assignment (Always keeping the rubric in the back of your mind)

1. Make all your notes into a narrative. That is, if something in answer to questions 1-5 was written initially as a list or as notes, turn it into a narrative of at least two paragraphs. A list may require you to write a short paragraph for each item on the list. You decide.
2. Take your work on questions 1-5 and write segues (smooth connections) between answers to the questions.
3. Bring a printed copy of your finished work to class on April 26, plus a computer, if you have one.
4. Bring a printed copy the rubric we have been using. I will ask you to evaluate your work using it.
5. If you have a TK20 account, I will show you how to upload your work to TK20.
